Zahara Rahman Chowdhury

MERN STACK DEVELOPER

Sylhet, Bangladesh | +8801726659028 | zaharachy72@gmail.com | GitHub | LinkedIn

To secure a position as a web developer and leverage my skills and passion for coding to contribute to the development of dynamic and user-friendly websites. I am eager to learn and grow in a collaborative environment, continuously expanding my knowledge and staying up-to-date with the latest web development trends

TECHNICAL SKILL

- **Front-end:** HTML | CSS | JavaScript | React JS | Tailwind CSS | Bootstrap | Firebase(for authentication and authorization)
- **Back-end :** Node JS | Express JS
- **Database:** Mongodb | MySQL
- **Tools:** Firebase Hosting | Git | Vercel | Visual Studio Code

PROJECTS

Craftopia (A Summer Camp website teaching arts and crafts)   Live-Site | GitHub->Client | Server

- It offers a comprehensive dashboard system with separate panels for admin, instructor, and student. Admins have the authority to approve courses and make instructors, while students can enroll in approved courses.
- It utilizes JWT for secure user verification and integrates React Stripe JS payment processing.
- Firebase Authentication is used to enable authentication, allowing only authenticated instructors to add courses and authenticated students to enroll, ensuring enhanced security and privacy.

Technologies Used: React JS | Tailwind CSS | Daisy UI | Firebase | Express Js | MongoDB | Vercel | JWT

Funfinity (Board and card games selling website)   Live-Site | GitHub-> Client | Server

- Board and card games selling website featuring a variety of available games displayed on the "All Toys" page with "View Details" button for authenticated users to access individual toy details.
- User authentication implemented using Firebase, ensuring secure access to protected routes and pages.
- Backend implemented using Express.js and MongoDB, featuring APIs for retrieving, adding, updating, and deleting toy data.

Technologies Used: React JS | Tailwind CSS | Daisy UI | Firebase | Express Js | MongoDB | Vercel

Flavour Adventure(A Chefs Website)   Live-Site | GitHub-> Client | Server

- It is a website featuring information about a chef, including their profile and background.
- User authentication integrated with Firebase, requiring users to sign up or login to access protected content.
- Protected "View Details" button that requires user login to access individual chef details and discover their top three dishes.

Technologies Used: React JS | CSS | Bootstrap | React-Bootstrap | Express JS | Firebase| Vercel
